

SIVA SUBURAMANIYAM V

Data Analyst

sivav6064@gmail.com | 9360648010 | Madurai, Tamilnadu | linkedin.com/in/siva-suburamaniyan

PROFESSIONAL SUMMARY

Data Analyst certified in **Data Science with Machine Learning**. Proficient in **SQL (Query Optimization)**, **Python (Pandas)**, and **Power BI** for automated dashboarding. Proven track record of **improving data processing efficiency by 40%** through **n8n automation** and delivering actionable, data-driven insights to drive operational growth.

PROFESSIONAL EXPERIENCE

Digital Marketing & Data Intern
Solar Powertech Solutions

05/2025 – 05/2025 | Coimbatore

- Data Management:** Maintained client databases and product inventory with **100% accuracy**, ensuring real-time data accessibility for the sales team.
- Performance Analytics:** Monitored engagement metrics and prepared **weekly reports** to identify high-performing marketing trends in the local market.
- Sales Operations:** Identified B2B leads and automated initial outreach, accelerating prospect movement through the **sales funnel**.
- Content Strategy:** Developed digital brochures and social media assets by translating technical specs into consumer-facing benefits.

EDUCATION

Bachelor of Science (B.Sc.) in Information Systems Management
Sri Krishna Arts and Science College

06/2023 – 04/2026 | Coimbatore

- Management & Finance:** Studied Cost Accounting, Financial Management, and Business Ethics to understand corporate operations and ROI.
- Technical Foundation:** Proficient in C, C++, Java, and Python with a focus on logic-building and software development life cycles.
- Data & Systems:** Specialized in Database Management (SQL), Business Intelligence, and HR/Marketing Analytics.
- Business Development:** Coursework in Entrepreneurial Development and Management to bridge the gap between technical solutions and business growth.

CORE COMPETENCIES

Technical Skills: SQL (Joins/CTEs), Python (Pandas, Matplotlib)

Visualization & Tools: Power BI, n8n, GitHub.

Data Science: EDA, Data Cleaning, Statistics

COURSES

Data Science With Machine Learning Using Python
Uptor (LMES)

PROJECTS

1. AUTOMATED ORDER PROCESSING SYSTEM FOR ZEPTO USING N8N

- Developed an end-to-end automation pipeline** using **n8n** to streamline order workflows, reducing manual data entry by **100%**.
- Integrated REST APIs** to fetch real-time order data, perform **Data Transformation**, and sync updates across multiple databases.
- Implemented error-handling logic** and conditional triggers to ensure data integrity and system reliability during peak traffic.
- Optimized workflow efficiency**, resulting in a **40% reduction** in order processing time and improved data accuracy for reporting.
